SEAMAN'S JOURNAL,

ON A NEW AND IMPROVED PLAN.

RECOMMENDED TO THE

Seamen of the United States,

BY H. HUNTER, JUN.

This method has been approved of by many respectable Navigators, who think it well adapted for long voyages. The lee-way column adjoins that of the courses, and the wind and weather being included in one column, there is no necessity of remarking either in the column of the transactions of the day, leaving more room for the same. The lee-way ought to be marked by the officer of the watch, with the course; there is sufficient room in the column for the wind, to mark with the same, variable, rain, squally, &c. *Squally &c.*

This image shows a blank, aged, cream-colored page from a ledger or account book. The page is ruled with a grid of vertical and horizontal lines, creating columns and rows for data entry. The right edge of the page shows the binding of the book, with some visible wear and tear. The paper has a slightly textured appearance and some minor discoloration consistent with age. There is a small, faint handwritten mark near the bottom center of the page.
